

Network Design Workshop

L2/L3 Lab Access Instructions

1 Introduction

2 Device to Port Mapping

3 Log in instructions

1 Introduction

This lab runs on a virtualized environment for Cisco IOS called "Dynamips". The method of access to each virtual switch or router is via Telnet to a specific port on the IP of the machine that runs the virtualization platform.

\$ telnet <HOST-IP> <PORT>

For example:

\$ telnet 10.10.0.241 2012

The instructor will provide the IP address of the host in this particular workshop

2 Device to Port Mapping

2.1 Router

Name	Type	Console Port
------	------	--------------

R11	7200	2011
-----	------	------

R12	7200	2012
-----	------	------

R13	7200	2013
-----	------	------

R21	7200	2021
-----	------	------

R22	7200	2022
-----	------	------

R23	7200	2023
-----	------	------

R31	7200	2031
-----	------	------

R32	7200	2032
-----	------	------

R33	7200	2033
-----	------	------

R41	7200	2041
-----	------	------

R42	7200	2042
-----	------	------

R43	7200	2043
-----	------	------

R51	7200	2051
-----	------	------

R52 7200 2052

R53 7200 2053

R61 7200 2061

R62 7200 2062

R63 7200 2063

2.1 Switch

Name	Type	Console Port
------	------	--------------

BB11	3725	2111
------	------	------

BB12	3725	2112
------	------	------

SW11	3725	2113
------	------	------

SW12	3725	2114
------	------	------

BB21	3725	2121
------	------	------

BB22	3725	2122
------	------	------

SW21	3725	2123
------	------	------

SW22	3725	2124
------	------	------

BB31	3725	2131
------	------	------

BB32	3725	2132
------	------	------

SW31	3725	2133
SW32	3725	2134
BB41	3725	2141
BB42	3725	2142
SW41	3725	2143
SW42	3725	2144
BB51	3725	2151
BB52	3725	2152
SW51	3725	2153
SW52	3725	2154
BB61	3725	2161
BB62	3725	2162
SW61	3725	2163
SW62	3725	2164

3 Log in instructions

After executing the telnet command, you will see something like the following:

Trying 10.10.0.241...

Connected to 10.10.0.241.

Escape character is '^]'.

Connected to Dynamips VM "R32" (ID 8, type c7200) - Console port

Hit ENTER at this point. Then, you will see this question:

Would you like to enter the initial configuration dialog? [yes/no]:

Answer "no".

The router will show some initialization routines, and finally, you will see the default prompt:

Router>

You can then go into privileged mode:

Router> enable

Router#

And then enter configuration mode:

Router# configure terminal

Router(config)#

And you are ready to start entering configuration statements. When you are done, exit configuration mode and save your changes:

Router(config)# end
